

SpectraSan™ Medical Instrument Spray

Fast, Easy, Safe and Economical to Use

- Longer lasting foam allows for better penetration of bio-burden
- Thicker foam completely covers instruments
- Keeps soiled instruments moist
- Eliminates dried on bio-film
- Will not harm any metals, plastics, rubber or corrugated tubing
- Safe for all instruments and scopes, whether flexible or rigid and extends usable lifetime
- No need to worry about messy spills or splashing when transporting
- Specially designed non-aerosol sprayer that is environmentally friendly
- Helps reduce cleaning time
- Has a neutral pH
- Easy and safe to use
- Free rinsing

This ready-to-use, high foaming prep spray is ideal for keeping soiled instruments, scopes and biopsy forceps moist, preventing bio-burden from adhering to the surface prior to decontamination. This multi-tiered enzymatic foaming spray covers the instruments and begins breaking down blood, fat, proteins and carbohydrates before they arrive in the central service/decontamination room. Our proprietary formulation dissolves the most stubborn soils, making cleaning easier and helping to speed up turnaround time by preventing bio-burden from drying on to the surface of instruments.

Foam Increases Contact Time

Our special foam spray nozzle is designed to provide a rich layer of foam on the instruments which increases contact time, allowing the enzymes to more effectively breakdown the bio-burden.

Perfect for use in operating rooms, endoscopy suites, outpatient surgery, dental offices, veterinary hospitals and other departments where instrument and scope cleaning is not immediately available. With **SpectraSan™ Medical Instrument Spray** you won't have to worry about messy spills ever again. Our formula stops splashing from occurring while transporting instruments to the central services/sterile processing department, and instruments arrive ready for decontamination. Plus, our product is free rinsing and 100% biodegradable.
