- Non-toxic, non-caustic and non-flammable
- Contains NO alcohol or ammonia
- Safe around people, pets, plant life and marine life

An all-natural, planet safe, multi-enzymatic glass and stainless steel cleaner that is 100% biodegradable and unlike other green acclaimed products, SpectraSan has earned the **EPA's "Designed for the Environment" seal of approval**. This remarkable all glass and stainless steel cleaner continues to impress cleaning professionals at restaurants, schools, healthcare facilities, daycare operations, athletic and fitness centers, hotels, commercial buildings, warehouses, factories and contract cleaning services. It is non-toxic and safe to use around people, pets, plant life and marine life.

Works like Magic

SpectraSan™ Glass & Stainless Steel Cleaner contains pure, vegetable based enzymes that actually digest grease, food waste and dirt, and then convert the soil into natural elements like oxygen, hydrogen and carbon. These organic elements naturally integrate with the environment rather than polluting it. With just one initial application, this amazing product makes quick work of even the dirtiest surfaces, by targeting grease, oil and organic matter and swiftly causing it to disappear. The soil vanishes while leaving the surface clean, dry and streak free. It simply works like magic.

Multiple Applications

SpectraSan™ Glass & Stainless Steel Cleaner cleans glass, mirrors, Plexiglas, fiberglass, plastic, stainless steel, and all other high polished surfaces. In addition, kitchen and bathroom clean-up are no problem for this environmentally friendly, but powerful cleaner. This extremely versatile product is also safe to use on all painted surfaces, range and stove tops, microwave ovens, stainless steel appliances, granite, ceramic, and porcelain counters as well as copper, bronze, aluminum and all other metal surfaces.

Fast, Easy and Economical

SpectraSan™ Glass & Stainless Steel Cleaner is easy to use. Simply mix 2 ounces (1:16) of product to a 32 ounce spray bottle and fill with water. Spray, apply, or mist on the surface and wipe clean with a paper towel, clean cloth or, ideally, a microfiber cloth. Wipe the surface until the solution begins to evaporate. Then stand back and admire the truly sparkling clean and streak free surface. It costs pennies to use and it is completely safe for the environment
